Lectures

Day	Time	Venue
Tuesday	12:00-12:50	A409
Tuesday	13:00-13:50	A409
Friday	13:00-13:50	A409

Assignments

An assignment is handed out more or less every third week. Each assignment primarily contains computer-orientated problems that you have to solve in Matlab. You are however free to use another programming language, like Python. After the completion of each assignment, you have to hand in a neat printed report. The due dates for these reports are indicated on the next page. Late reports will not be accepted.

Question session

There will be an informal question session once a week (tentatively on Tuesdays at 13:30) in room A409. During this session you can ask questions on the relevant assignments and discuss the assignments among yourselves. These questions are usually on Matlab and certain concepts discussed in class. Lectures may be presented in this time slot from time to time.

Class Tests

You will write two class tests during the semester. The purpose of the class tests is to evaluate your knowledge of the theoretical aspects of the course. The preliminary dates for these tests are as follows...

Test	Date	Time	Venue	Chapter
1	Friday, 1 September 2017	14:00-16:00	A409	3-5
2	Friday, 3 November 2017	09:00-11:00	A409	6, 8-11

Continuous Evaluation and Performance Mark

This module is evaluated continuously. Your performance mark is a weighted average of your assignment mark and your class test mark. The weights are as follows...

Performance mark					
Five assignments:	5	$\times$	16%	=	80%
Two class tests:	2	$\times$	10%	=	20%
					100%
